

- Have you ever tried to search the movie?
- Have it ever happened to you that you forget the correct name of the movie/show?
- You tried to search it on Google but only useless website and ads...
- Is it a good movie/show...?

Movie Finder

The program asks the user for keywords to search matched movies. It then will show up the certain amount of movies and their IMDb scores as well as the poster of the movie.

Provide suggestions on whether to watch the movie or not based on the ranking score (If the score is higher than 7, the movie will be considered as good movie for recommendation).

Provide a link for the user to access the purchase of the ticket by adding user's location as search keyword.
